Professional Experience

With a professional career based on experience designing outdoor recreational spaces, Mr. Luck's focus is partnering with municipalities and counties to conceive and then implement the design of many different recreational amenities as an integral part of a community's infrastructure.

Mr. Luck has been the project manager or worked in the capacity of landscape architect and park planner on projects including: athletic facilities, open space master plans, trail master plans, landscape aesthetics and recreation enhancements. He has provided design services including master planning, theming and character development, visioning, public meeting facilitation and partnering, design development, construction document preparation and construction administration.

As the owner and leader of Luck Design Team, Mr. Luck distills this public recreational background into a focused company mission:

*"To assist clients in developing a parks and recreation vision -
and to make those visions a reality!"*
